

Project :	Date :
Cat No. :	Type :
Notes :	Volts :

Description:

The **NTALB-102 (side)** and **NTALB-103** LED bar design is distinguished by its flexibility because it is in silicon texture, easy to bend and allows to fit irregular shape like around support beam or curved wall as example.

Housing:

The **NTALB-102/103** are a high precision extruded silicon bars that can accept a low-power LED source to high power with maximum 10mm size.

Mounting:

Mounts within on a surface with:

FC Fixed clips (set of 2)

Application/Installation:

The **NTALB-102/103** LED bars can be installed, for up or down applications. It can be curved, shaped to curved surfaces for a neon effect. It does not deform and allows great flexibility.

Electrical and Electronics:

High quality diodes tested (LM80) and certified life cycle for 60,000 hours (L80). All certified electrical and electronic components have been re-tested over the years for compatibility within products and for specific applications. All products exceed current standards.

Power supply not included, consult factory. Consult the LED specification sheet for the appropriate optional dimmers and controls combination for your project.

Homologation:

Conforms to ANSI/UL standard UL-2108
Certified to CAN/CSA standard 22.2-9.0
