Description:

The **NTALB-192** LED bar design provides a unique linear robust ultra modern lighting solution combining style, performance and durability in a medium width strip, while reducing constructions and operating costs through installation time, energy savings and maintenance free application.

A lighting solution for theater, hotel entrance, shopping center.

Housing:

The **NTALB-192** is a robust high precision extruded anodized aluminum that can accept a LED linear source from normal to high power. Each assembled Led Bar included two (2) aluminum end caps screwed.

Lens:

2 Precision polycarbonate lens available in:

OP opal
FR givré

Mounting:

Mounts directly on surface on wall and it is secured

Application/Installation:

The **NTALB-192** LED bar can be installed for up and down light diffusion directly on wall. Standard length is 1 meter or 2 meters. Consult factory for special length.

Consult factory for damp application or splash area using our silicone jacketed IP67 sources. **(WP)**

Voltage:

12 VDC
24 VDC

Electrical and Electronics:

High quality diodes tested (LM80) and certified life cycle for 60,000 hours (L80). All certified electrical and electronic components have been re-tested over the years for compatibility within products and for specific applications. All products exceed current standards.

Power supply not included, consult factory. Consult the LED specification sheet for the appropriate optional dimmers and controls combination for your project.

Homologation:

Conforms to ANSI/UL standard UL-2108
Certified to CAN/CSA standard 22.2-9.0
